AIS TRANSMITTER MARKER

 <p>The diagram illustrates an AIS Buoy Transmitter Marker system. A satellite in orbit communicates with an AIS Buoy (labeled 'AIS Buoy') on the water's surface. The buoy is connected to a red dashed line representing a net. The net is anchored to the seabed with an 'ANCHOR OR WEIGHT'. The seabed is shown with fish and green vegetation. The buoy is also connected to a red dashed line representing a net.</p>	<p>Advanced AIS technology transmits the unique ID and location of the net. Signal transmits up to 10nm. Battery life up to 240 hours. Stable and reliable RF performance. Waterproof to IPX7 standard. Comes complete with battery recharger.</p>	<p>£150.00</p>
